

Happy pigs, happy farmers

I work with a company in Vietnam that represents and imports pig genetics from France and livestock equipment from Europe. Our goal is to provide farmers with a range of innovative solutions, including advanced genetics, artificial insemination (AI) stations, and modern housing systems. With years of experience in the livestock sector, we collaborate with top enterprises across Vietnam, as well as with government-led initiatives.

Nguyen Thi Kieu Diem

Sales at The Asia-Pacific Import-Export Joint Stock Company (APE)

Hochiminh City, Vietnam

What are your specialties in the pig industry?

- 🎬 Imported pig genetics from France
- 🎬 AI station solutions
- 🎬 Housing and equipment systems

What are the projects that you've been most proud of?

- 🎬 Introduced and supplied French pig genetics to large-scale farms in Vietnam.
- 🎬 Offering housing and equipment solutions tailored for modern pig production.
- 🎬 Collaborated with leading Vietnamese corporations and state-owned projects to optimize their breeding and production systems.

Your current focus:

- 🎬 Target partners: Medium and large-scale pig production enterprises in Vietnam.
- 🎬 Most critical issues in the pig industry today: Biosecurity and animal welfare.
